A Handbook For Stream Enhancement & Stewardship

Synopsis

A Handbook for Stream Enhancement and Stewardship is a basic resource intended to help individuals, groups, organizations, companies, communities, and governments plan and carry out environmentally sound, cost-effective stream corridor assessment, enhancement, and stewardship programs. Using the watershed as the basic unit of reference, the Handbook provides ideas and information with which readers can assess and document local stream conditions, learn about and evaluate methods of enhancement, devise and implement enhancement plans, and then maintain the stream and stream corridor in its enhanced state of better health and balance. While not a comprehensive technical manual for professionals trained in stream restoration, this resource does provide a solid foundation by which volunteers and lay readers may become informed observers, advocates, and organizers of stream enhancement programs and effective participants in their implementation.

Book Information

Paperback: 188 pages

Publisher: McDonald and Woodward Publishing Company; 2nd ed. edition (April 12, 2006)

Language: English

ISBN-10: 093992398X

ISBN-13: 978-0939923984

Product Dimensions: 8.5 x 0.6 x 10.9 inches

Customer Reviews

The Izaak Walton League is a private national organization founded in 1922 and dedicated to conserving, maintaining, protecting, and restoring the soil, water, and other natural resources of the United States and other lands, and to educating the public about such resources and their needs. For more than thirty years, the Izaak Walton League's watershed stewardship programs have developed innovative educational programs for groups and individuals. The League has educated and motivated citizens to clean-up stream corridors, monitor stream health, restore degraded stream banks, and protect dwindling wetland acreage. These important watershed stewardship

activities have been implemented nationally and in communities across the country through the League's more than 300 local chapters.

A Handbook For Stream Enhancement And Stewardship from the Izaak Walton League of America is an excellent study of conservationist activities in dynamically aiding the restoration, enhancement, and environmental maintenance of rivers and streams. Deftly providing readers with a conceptual grasp of the "stewardship" responsibilities of various groups, organizations, individuals, companies, communities, and government planning agencies, A Handbook For Stream Enhancement And Stewardship informatively presents a ideas and expertise with which to actively make a difference in maintaining and enhancing rivers and streams for purposes of the flora and fauna dependent upon them, as well as the critically important role of the stream with respect to watershed dynamics. A core addition to personal, professional, environmental activists, academic, and community library Environmental Studies reference collections, A Handbook For Stream Enhancement And Stewardship is very strongly recommended as an expert informational resource for environmental and waterway restoration and conservation.

I read this entire book only to discover it is a handbook. It would be great as a textbook. It was written by several writers which made it difficult to read. Some were better writers than others and some should have scaled down their writing.
