Customer Reviews

"A textbook works best when the author defines a particular brief, a particular target market, and then, in writing the book, sticks to it. This, Dr Hill has done. Throughout, the book reads as though the author is based in the real world, with emphasis where such is proper. Overall this book will help its target market of students and practitioners wishing to improve their knowledge of small animal dermatology. It would sit happily alongside one of the newer, small format, photo-full books on the subject. It does not attempt to replace the standard tome, but for those attempting the Certificate in Veterinary Dermatology it should be a 'must buy'." C Chesney, Journal of Small Animal Practice, January 2003
