# Cultural Competence Compendium

## **Synopsis**

The aim of this work is to help physicians examine each patient's cultural background so that appropriate, respectful, patient-centred care is provided. It consists of an annotated list of resources such as policies, publications, and web sites regarding health care and communication issues confronting people from under-represented and under-served racial, ethnic, and socio-economic groups and those with physical and mental illnesses or disabilities.

## **Customer Reviews**

Cultural Competence Compendium. A unique an ultimate resource in providing patient-centered care. The American Medical Association's premier contribution to developing the "Fifth Competence" for physicians. "The Cultural Competence Compendium is a resource for physicians in identifying issues surrounded different populations - and learning to examine their own issues as well - so that the care we as physicians provide is the right care for each and every patient we see and the highest quality of care for every patient. How do you know whether the care you give is truly culturally competent? Being by reading the pages of this book and making use of the information and the resources you find here." Nancy W. Dickey, MD President American Medical Association As the first product of the AMA's broad-based Culture Competence Initiative, the Cultural Competence Compendium reflects a comprehensive application of the term "culture." The publication includes resources for health care and communication issues confronting people from underrepresented and

underserved racial, ethnic, and socioeconomic groups and those with physical or mental illnesses and disabilities. The publication also features resources for children and adolescents, older adults, and people at the end of life, as well as for those dealing with issues related to domestic violence, genetic conditions, organ donation, and sexuality.
