This was a Birthday Gift for an 8yr old boy who LOVES Dino's. Turns out he's never seen this book & fell in LOVE with it instantly.

Excellent supreme terrific

Paleontology field guides are exercises in speculation regarding the appearances and habits of the subjects. This book is easy on the eye but would have benefitted from closer scrutiny by the author and editor. As another reviewer noted, the small drawings comparing the animals depicted to a human or parts thereof are sometimes of inconsistent scale; for example a 13' beast appears larger than a 20' one on the next page. But the worst defects are the weights attributed to the creatures depicted. Among the more laughable such instances is a pterosaur with a 3' wingspan is said to

weigh 45 pounds!

Very nice book that has full color pages on over 200 dinosaurs. And in the back there are the basic descriptions of over 300 additional dinosaurs

Good
