Chemistry: An Introduction To General, Organic, And Biological Chemistry (13th Edition)

Synopsis

For one-semester courses in General, Organic, and Biological Chemistry A friendly, engaging text that reveals connections between chemistry, health, and the environment Chemistry: An Introduction to General, Organic, and Biological Chemistry , 13th Edition is the ideal resource for anyone interested in learning about allied health. Assuming no prior knowledge of chemistry, author Karen Timberlake engages readers with her friendly presentation style, revealing connections between the structure and behavior of matter and its role in health and the environment. Aiming to provide a better learning experience, the text highlights the relevance of chemistry through real-world examples. Activities and applications throughout the program couple chemistry concepts with health and environmental career applications to help readers understand why the content matters. The text also fosters development of problem-solving skills, while helping readers visualize and understand concepts through its engaging figures, sample problems, and concept maps. The 13th Edition expands on Karen Timberlake's main tenets: relevance, a clinical focus, educational research, and learning design. New applications added to questions and problem sets emphasize the material's relevance, while updated chapter openers with follow-up stories help readers form a basis for making decisions about issues concerning health and the environment. New problem-solving tools in this edition, including Try it First and Connect, urge readers to think critically about problem-solving while learning best practices. Also available with Mastering Chemistry. Mastering[®] Chemistry[®] is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students with powerful content. Instructors ensure students arrive ready to learn by assigning educationally effective content and encourage critical thinking and retention with in-class resources such as Learning Catalytics[®]. Students can further master concepts through homework assignments that provide hints and answer-specific feedback. The Mastering gradebook records scores for all automatically graded assignments in one place, while diagnostic tools give instructors access to rich data to assess student understanding and misconceptions. Note: You are purchasing a standalone product; Mastering[®] Chemistry does not come packaged with this content. Students, if interested in purchasing this title with Mastering[®] Chemistry, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the physical text and Mastering[®] Chemistry, search for: 0134416791 / 9780134416793 Chemistry: An Introduction to General, Organic, and Biological Chemistry Plus Mastering Chemistry with eText -- Access Card Package, 13/e Package consists of: 0134421353 / 9780134421353 Chemistry: An Introduction to General, Organic, and Biological

Customer Reviews

Karen Timberlake is Professor Emerita of Chemistry at Los Angeles Valley College, where she taught chemistry for allied health and preparatory chemistry for 36 years. She received her Bachelor's Degree in Chemistry from the University of Washington and her Master's Degree in Biochemistry from the University of California at Los Angeles. Professor Timberlake has been writing chemistry textbooks for 40 years. During that time, her name has become associated with the strategic use of pedagogical tools that promote student success in chemistry and the application of chemistry to real-life situations. More than one million students have learned chemistry using texts, laboratory manuals, and study guides written by Karen Timberlake. Professor Timberlake belongs to numerous scientific and educational organizations including the American Chemical Society (ACS) and the National Science Teachers Association (NSTA). She has been the Western Regional Winner of Excellence in College Chemistry Teaching Award given by the Chemical Manufacturers Association. She received the McGuffey Award in Physical Sciences from the Textbook Authors' Association for her textbook Chemistry: An Introduction to General, Organic, and Biological Chemistry, 8th Edition, which has demonstrated her excellence over time. She

received the "Texty • Textbook Excellence Award from the Textbook Authors™ Association for the 1st Edition of Basic Chemistry . She has participated in education grants for science teaching including the Los Angeles Collaborative for Teaching Excellence (LACTE) and a Title III grant at her college. She speaks at conferences and educational meetings on the use of student-centered teaching methods in chemistry to promote the learning success of students. When Professor Timberlake is not writing textbooks, she and her husband relax by playing tennis, ballroom dancing, traveling, trying new restaurants, cooking, and taking care of their grandchildren, Daniel and Emily.

Going through the study checks and questions and problems for every chapter has helped me tremendously to keep a high A in my Chem 105 class. I wish there were answers to the even problems as well to check myself.

great deal! I read, highlighted, and wrote on this book more than on any other textbook I ever had. It was in great conditions when I got it (now it looks like a kindergarten book) and I would only recommend you to buy it if your professor is using the same version or the next one because it is the same thing except for the cover and pages numbers.

It arrived in a timely matter, and was exactly like the product which was featured. The cover makes chemistry not seem so terrifying!

I had to have this book for my Chemistry class. This seller shipped item fast, and received book in just a few days, and was very impressed, because I have bought other items off this site and it take a long time to receive it. It was great to receive the fast delivery, also the condition of the book was exactly in the condition stated, it was like new, no damage at all to book, no writing or no highlighting or anything in the book, and it was for a great price only 4.50 plus shipping, cant beat that at all. The only problem I had with this item was it didn't have the mastering chemistry access code with it, and I have to have it for my class as well, and to be a new book never used, I thought it should be included, but I not complaining cause of the great deal I got, so I can buy what I need cause of the extra money I saved on this item. I recommend anyone purchasing from this seller, cause the honesty means a lot. Thanks for the fast shipping and the new condition book, for such a great price.

This is a great chemistry book. It explains everything in detail. I guarantee if you read the book along with your professors lecture, you WILL get an A or B in the class! The book was in good condition. I was very happy with my product.

Painful. Had trouble getting thru the required readings in advance of classes. Not that book is bad per se, just that it's a heavy read. Other class members using same book found it very helpful. Different learning styles I suppose.

A

Got an " A " in subject!
