# A Field Guide To Amphibians And Reptiles In Arizona

## **Synopsis**

This beautifully illustrated full-color guide is a collaborative effort between the Arizona Game and Fish Department, Arizona State University, and Mesa Community College. The book provides concise information on all 141 species of amphibians and reptiles found in Arizona. Species accounts include high quality color photographs, compendious natural history information, detailed range maps, custom illustrations, line drawings, and call outs to key identification characteristics. This guide is a practical tool for both frequent wildlife watchers and the occasional visitor to the Arizona outdoors. Paperback. 150 pages (fully illustrated).

This guide is a practical tool for both frequent wildlife watchers and the occasional visitor to the Arizona outdoors. Paperback. 150 pages (fully illustrated).

Long awaited, long overdue, and lives up to expectations. A Field Guide to Amphibians and Reptiles in Arizona is a paperback, a bit large for pockets but okay for backpacks and many camera bags.

This is a basic field guide, NOT an exhaustive review, so buy it to find and identify the animals. Colour photos that range from okay to really nice, and all are useful. Decent price and a must have book for anyone seriously interested in the herpetofauna of the United States. Arizona does have, acre for acre, more reptilian species than any other state, so you get a lot of reptiles in this small volume. If you are considering a purchase, just go ahead and order. You will almost certainly not regret owning A Field Guide to Amphibians and Reptiles in Arizona.

We live in the desert, and constantly refer to our field guides both for our own use and to teach our grandchildren about their wonderful environment. This is a top-notch guide from Arizona Game and Fish, in cooperation with ASU, MCC and PARC. The layout is great, there is a good glossary, and index is by both common and scientific name. My one complaint/suggestion is that the Sonoran Desert Toad should be tagged as VENOMOUS. While it will not kill you or me, I know several people who have lost four-legged friends (and/or racked up four-digit vet bills) to these critters. Personally, we toss them into a bucket when they come out at night and transport them to a wash in the nearest uninhabited area come morning.

Best herp field guide for Arizona out there! I've got a copy in each vehicle and for the office. Somehow they keep disappearing and I just keep replacing them! I am anxious to see any updated version they might publish. J. Schudda

This is everything a regional field guide should be. It has great pictures, clear diagrams, and excellent information. It's also the perfect size. Not too big to fit in a day pack. I highly recommend this book.

This is a helpful guide. Includes maps.

Great pictures to view (in color) and so much valuable information about each creature. A must have for all those living in Arizona and those wanting to know about Arizonan living in the wild.

Great book. Informative, well written, excellent photos.

Headed for Arizona in a couple of months. I wanted a less cumbersome but inclusive field guide to the herps of Arizona. This fits the bill perfectly. The quality of the illustrations, text, and range maps

is excellent. Highly recommend.
