The 12 Unthinkable Horrors Of Human Existence: A Manual For Atheists, Agnostics And Secular Humanists

Synopsis

In this groundbreaking and controversial book by I. M. Probulos, The Twelve Unthinkable Horrors of Human Existence are revealed to the world. A shocking title, to be sure, but this is actually a book of joy, purpose, and hope. It is for those without faith or do not think faith is a virtue. This book promotes reason, rationality, the scientific method and skepticism. Therefore it is against anything based on faith without evidence. This includes superstition, pseudo-science, junk science, the supernatural and, of course, religion. If your faith is strong and your world revolves around your religious beliefs, this book is not for you. It is not meant to persuade believers. Instead, it is a self-help manual for the hundreds of millions of non-believers worldwide. Part One introduces the 12 Unthinkable Horrors. To atheists, agnostics, human secularists, freethinkers and those without any religious faith, these won't be horrors at all as you've acknowledged most of them many years ago. Agreement with all of them is not expected – debate is encouraged. If you wish to learn more, comment or debate the 12 Unthinkable Horrors of Human Existence, they are: 1) There Is No Afterlife 2) God Does Not Answer Prayers 3) Life Is Chance 4) Life Is Not Fair 5) There Is No Eternal Justice 6) God Is The Invention Of Man. 7) A Single Mistake Can Ruin Your Life 8) Man Is Not Special 9) There Is No Absolute Morality or Truth 10) Free Will Is a Myth 11) Experts Can Be Wrong 12) Romantic Love Is A Myth. But you need to read the entire book before you comment, please. Part Two explains the Statistical Theory of Everything, which, quite succinctly, explains everything and is never wrong. Chapters on the Addictive Behaviors and Mind Control illustrate how they impact our free will. • In New Commandments For The 21st Century and Prescription for Living, the author goes further than just replacing "God bless you" with Gesundheit and "Merry Christmas" with "Happy Holidays". Issues addressed include grieving without God, unfairness, injustice, and purpose. Part Two ends with a chapter on humor and irony. If we are going to thrive in a world of reason and rationality, a sense of humor is required. Part Three concludes with interviews, comments and excerpts from some of the best and well-known authors in this genre: Neil deGrasse Tyson, Victor J. Stenger, Steven Pinker, Daniel Dennett, Richard Carrier, John Loftus, Aron Ra, and many others. Their comments are heartfelt, personal, and illustrate how millions can find meaning and purpose without faith. I thank them for their contribution. Customer Reviews

I would certainly recommend this book to anyone who is on the fence about god belief. It is likely to push you over into outright atheism. While I've read a few books about atheism, none of them have been so succinct and readable as this one regarding the difficulty of believing that there's a god or gods who love and care for us. Created the universe and us. Are involved in our daily lives. Have a plan for us including either eternal life or torture at the end. I've gotten halfway in the book. At this point the author has covered most of the Unthinkable Horrors (they're mostly Undeniable Truths to me, but I am an atheist). I am looking forward to reading his solutions for handling these horrors in an emotionally satisfying way. I have found my own way. Example: you're alive until you're dead and being dead is the same as it was before you were born. My only gripe so far is the section on free will. It's hard to accept being responsible for everything I do when at the same time I could not have done anything else because of my genetic makeup and environmental pressures. I think free will doesn't, in fact, exist. If you truly had free will, YOU would be God.

All of his books are full of information that can be found in other books but his style sets him apart. As an Atheist myself I'm always looking for new a fresh perspectives. Great read!!

Very interesting.book.

A+++

Probulos writes an entertaining treatise on the ridiculousness of religion. There was a time before 1859 we just didn't know how we came to be. Now 156 years later still believe crazy ideas that would put most people in the asylum

An exhaustive amount of good information full of links to other websites that give an atheist a sort of toolkit for debate with a theist. There is also much good wisdom the atheist can obtain towards living a good life without belief or worship of an imaginary sky-daddy!

Very very good read- list in detail the human fallacies that have made everyday living a struggle. Expose of world myths and legends

Enjoyed the authors take on all things horrible to the existence of rational humans. Strip away the voodoo and religious hocus pocus and life gets a lot easier.
