Public Health Science And Nursing Practice: Caring For Populations

Synopsis

How do you solve population-level health problems and develop appropriate nursing interventions? This unique, problem-solving, case-based approach shows you how. You'll encounter three different case studies in every chapter—two in the text and one online at DavisPlus—that explore concepts such as community assessments, public health policy, and surveillance. Step by step, you'll develop the knowledge and skills you need to apply public health principles across a variety of health care settings, special populations, and scenarios.

Book Information

Paperback: 696 pages

Publisher: F.A. Davis Company; 1 edition (July 21, 2015)

Language: English

ISBN-10: 080362199X

ISBN-13: 978-0803621992

Product Dimensions: 8 x 1 x 10 inches

Shipping Weight: 3.1 pounds (View shipping rates and policies)

Best Sellers Rank: #11,529 in Books (See Top 100 in Books) #11 in Books > Medical Books > Nursing > Home & Community Health #11 in Books > Textbooks > Medicine & Health Sciences > Nursing > Clinical > Home & Community Care

Customer Reviews

The product exceeded the expectations because it was in perfect condition with no creases or any spills. The delivery was also quick and thus the overall experience was amazing.

It's so boring, but much needed for class. Repeats the same information over and over.

Thank you! Needed for class, delivered and met my expectations.

Great book with great info!

So much liberal demagoguery in here. I am all for helping the poor, but you can't blame everything on those who are not. The problems are much bigger and deeper than what authors attribute disparities to. I only have the book because it's required for my course.

Well written

Great condition

Great book and delivery
