The Biology Of Nicotine: Current Research Issues

Synopsis

In this volume, more than 40 leading investigators present findings on the neurochemical actions, pharmacology, and physiological and behavioural effects of nicotine. The contributors focus on four major areas of current research: the structure and biochemical functions on nicotinic receptors; the distribution, metabolism, and actions of nicotine and its metabolites; the neurochemical actions of nicotine and the modulation of these actions by stress hormones; and the involvement of nicotinic receptors in dementias of Alzheimer type.

Book Information

Hardcover: 240 pages

Publisher: Raven Pr (January 1992)

Language: English

ISBN-10: 0881678600

ISBN-13: 978-0881678604

Product Dimensions: 1 x 6.8 x 9.8 inches

Shipping Weight: 1.6 pounds
