Customer Reviews

This Guide was adequate for organs and blood vessels. There was no muscle labeling and no muscle dissection covered which is what I was most interested in and was quite surprised it wasn't covered. There was also no coverage of the nervous system

this was exactly what I needed for my biology class and it was brand new for an awesome price! glad I bought it!

used this as a guide for 9th grade bio course. it provided all the detail and diagram that we needed to have a successful activity.
