Case Studies In Nurse Anesthesia

Synopsis

Case Studies in Nurse Anesthesia provides succinct and relevant information that can be used by students and professionals in the operating room. Information is written in a question and answer format for easy understanding and the chapters are divided into surgical specialties, with a focus on the most frequently performed procedures. Each case describes the entire perioperative course and discusses the patient's history and physical, anesthetic concerns, surgical concerns, anesthetic management, differential diagnosis, and potential complications.

Customer Reviews

What I love about this book is you get quick, easy access to information on specific cases. This book is divided into units such as otolaryngology, general surgery, vascular surgery, ect. Then those units are divided into chapters of specific types of cases. The chapters are fairly short, easy to read, and offer quick, valuable tips on the cases you are referring to. This would be of great use for last minute info on a case you would be doing shortly. This is great for students!

This book is aaaaamazing!:) I have utilized it so many times already and I have only had it for a few months. I love that it puts the pathophysiology in each study and describes pre,intra, and post anesthetic considerations! So easy to use as a reference for clinical and for presentations in class!

nothing wrong with it. I have found other books of case studies that give physiology background to

the cases they present which i prefer.

Excellent info! Well condensed!

Excellent

I provides detailed information as far as the pathophysiology aspect but it would be even better if it gave a detailed anesthetic plan as well. Great resource for SRNAs.

Case studies provide anesthesia concepts vital for anesthesia provider. The book was in new condition. Shipment was expedient. Case studies are very informative, concise and clear.

I haven't looked at too many case study books, but I do like this one. I think it does a nice job of giving you concise information without having you read through long chapters of text.
