Molymod Molecular Modeling Set By Indigo To Accompany Organic Chemistry

Synopsis

This Molymod Molecular Model Set is configured specifically for organic chemistry. Ideal for building alkenes, carbonyls, chiral centers, isomerism, and organo-metallic complex ions.

Book Information

Misc. Supplies

Publisher: McGraw-Hill Education; 5th edition (July 11, 2002)

Language: English

ISBN-10: 0072846097

ISBN-13: 978-0072846096

Product Dimensions: 6.7 x 1.4 x 9.2 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)

Average Customer Review: 3.3 out of 5 stars 6 customer reviews

Best Sellers Rank: #373,510 in Books (See Top 100 in Books) #48 in Books > Science & Math > Chemistry > Molecular Chemistry #453 in Books > Science & Math > Chemistry > Organic #1287 in Books > Science & Math > Chemistry > General & Reference

Customer Reviews

Francis A. Carey is a native of Pennsylvania, educated in the public schools of Philadelphia, at Drexel University (B.S. in chemistry, 1959), and at Penn State (Ph.D. 1963). Following postdoctoral work at Harvard and military service, he was appointed to the chemistry faculty of the University of Virginia in 1966. Prior to retiring in 2000, he regularly taught the two-semester lecture courses in general chemistry and organic chemistry. With his students, Professor Carey has published over forty research papers in synthetic and mechanistic organic chemistry. In addition to this text, he is coauthor (with Robert C. Atkins) of Organic Chemistry: A Brief Course and (with Richard J. Sundberg) of Advanced Organic Chemistry, a two-volume treatment designed for graduate students and advanced undergraduates. He was a member of the Committee of Examiners of The Graduate Record Examination in Chemistry from 1993-2000. Frank and his wife Jill, who is a teacher/director of a preschool and a church organist, are the parents of Andy, Bob, and Bill and the grandparents of Riyadh and Ava.

I really like the Molymod Molecular Set for Organic Chemistry. I love that the pieces are big enough to easily work with and that the bonds can be bendable or stiff. The only thing I don't really like about it is that there aren't a lot of bendable bonds in the set to make larger molecules other than

cyclooctane. The was about the only disappointment, but if you are a visual person, this product will most surely get you through Organic I and possibly Organic II (currently taking that). Good luck with your studies though regardless of what product you decide on. It's all about personal preference in the end.

Don't buy this the molecules broke just by putting it on and taking it off

Came in a reasonable amount of shipping time, and the product was what I ordered. It was actually much larger than I thought it would be and contained everything I needed. Thank you!

Awesome deal! Everything was in new and great condition

The pieces are hard to connect with bonds, and you'll rip your fingers apart when trying to take them apart. The hydrogen atoms are semicircles, so you have to curve you fingers under the ball to take them out, which hurts. You can find a much better kit out there that doesn't rip the skin off your fingers.

Organic chemistry is difficult for many people but A's are essential for those pursuing careers in the medical field. To truly understand organic chemistry, one must be able to visual the structural makeup in total 3-D. Making models is extremely helpful. It pulled me from a "B" to an "A".
