Customer Reviews

Disrupting Maize offers a detailed and innovative examination of the ways in which food both becomes heritage and a focus of political activism. In 2010, Mexican cuisine was added to UNESCO's list of intangible cultural heritage. M ndez Cota maps the complex and dynamic field of dissent and disagreements that challenged the nationalizing narrative represented by the listing. In doing so, she argues that diversity and dissent is an ongoing and integral aspect of intangible heritage. In illustrating the ways in which intangible heritage interconnects with disputes over knowledge production and biotechnological developments and applications the book provides a rare and sophisticated glimpse into the political and cultural complexity of 'living heritage' TM. (Laurajane Smith, Professor of Archaeology and Anthropology, Australian National University) Contamination is present in all sovereignty and identity is always necessarily transgenic. In the maize wars nationalist desire crosses biotechnical critique on its way to a posited refoundation that cannot know its limits and confuses its core. This fascinating book disrupts biological disruption itself while refusing to give in to endemic cultural moralisms. Its wager for democracy actively dislocates the compromised nostalgia of some emancipatory narratives while

resisting the calculation of the future. (Alberto Moreiras, Professor of Hispanic Studies, Texas A&M University)

Gabriela MÃ©ndez Cota is a post-doctoral researcher at Universidad Autonoma Metropolitana-Unidad Cuajimalpa.
