A Breach Of Trust

Synopsis

You have a wonderful life. You're running a business, have money in the bank and get to visit with all your friends and family whenever you like. Then one day you wake up to find someone shoving a pill down your throat in some lowdown nursing home situated in a dangerous part of the city. Without your permission, they're liquidating your business and making all of your money disappear. You do whatever you can to try to get out of this nightmare, but discover the people who did this to you are simply too powerful. Think it can't happen to you? Think again. This is the true story of a newly licensed nursing facility administrator (LNFA) and the people she meets. The stories they tell her are both hard to believe and impossible to ignore. She begins investigating and the more layers she peels away, the worse it gets. Eventually, this leads to catastrophic consequences for three special people under her care. Can she repair the damage and stop the madness before it's too late? Or are the forces against her too powerful? A Breach of Trust exposes the weakest link in the freedoms we all hold dear. Cross the wrong line, say the wrong thing, and at any moment you too could be stripped naked and taken captive. It is for these three special friends and all the future victims that Susan Hodges offers this advice: whatever you do, don't cross these people because soon, you might discover your life belongs to them now!

Susan is a retired LNFA in Stamford, Texas. This is her first book. You can contact Susan at ABreachofTrust2016@gmail.com.

A truly inspiring story that makes you think about how little the elderly are truly thought about in

today's society. Everyone needs to read this book in order to open their eyes on how the so called "Justice System" treats the people that need their help the most. The author states that one day it could be you that gets a pill shoved down your throat and drained of your life's hard work; in order for the ones that are supposed to protect you to become even more filthy rich than they already are. By reading this book at least you'll be able to spot it coming and find ways to protect yourself; because no one else is.

This book validates much of what many elder and disability advocates are reporting to their State legislators as this has become what is being known as the American Greed - which the tv show reports of the greed of money and what is usually lost is the financial resources of a trustworthy person in their investments. But in the Breach of Trust what is lost is human and constitutional rights and the lives of our most vulnerable citizens among us all without very few possibilities to get out once placed into a guardianship in administrative courts known as probate courts were created to handle the affairs of the deceased. The Breach of Trust identifies what it truly means to become civilly dead in the eyes of the law for nothing more than profit under the deception of protection in guardianship.

From the moment I started reading it kept my attention. The more I read the more I learned. I know first hand what happens to the Elderly in Nursing Homes, Probate Guardianship Programs, and Hospice. With all I knew this gave me more insight and understanding of what happens behind closed doors. I would write a book of the Horrors my Mom suffered under Probate Guardianship Program if I knew where to start. It would include pictures, and documentation of records. maybe a DVD with the book. I would decide later what might be on the DVD. Get the book. Anyone of us could become a victim.

Unbelievable! As a healthcare provider I am appalled by this outright cruelty. I know this author personally & trust her implicitly. Something must be done. We can't save these 3 but we can, however get involved to stop the injustices perpetrated on our elderly on a daily basis. Where can we start?

Very good read!!! From the moment I started reading I couldn't put it down. It was very enlightening!

Definitely a book I'd recommend.

Â Being a victim of this system, Willie Jo Mills and her children were victims just like the Almond Joys in the book. Harris County Texas Probate judges and Attorneys are ruthless, evil people. Their main motive is to cause family conflict, drain family members assets and in the end destroy the person in guardianship with forced "Hospice". The \$45 month the courts charge now is \$175 is nothing more than racketeering under the Color of Law. Wards in guardianships are exposed to deadly drugs intentionally to terrorize the ward and family. DADS and APS are paid off to turn their heads(I had first hand experience).The attorneys deliberately destroy the family character for starters. After your love one dies from abuse and you file a complaint at the Judicial Branch Certification Commission, you find out that the Commission in reality is a gate keeper for the system and nobody is held accountable. In the state of Texas the Attorneys General Office and Governor Abbot has Declared "WAR ON THE ELDERLY AND DISABLED) . The state of Texas has "NO MINIMUM STANDARDS" for guardianship service providers and attorneys under guardianship thus promoting exploitation, abuse, and neglect of the ward under their care with "ZERO" accountability

Elder looting under the color of law is pervasive across the whole United States - and in other countries. it is a multi-BILLION \$ a year business. The legal vultures and their accomplices are on the hunt for those with A\$\$ET\$, no children or children that simply will argue with one another. Beware of how you answer hospital admission form questions that are not really required for admission - this is one of the places that starts your admission to a black hole. Another thing, be aware of the need to get along with your neighbors so that they don't call Adult Protective Services about their "concern" for you. Above all, read this book and educate and protect yourself as no one else can or will do!
