Customer Reviews

children's book

This book provides valuable information for campers, hunters, or anyone who lives or spends time near wooded areas. Most important are the pictures of Florida's venomous snakes. I bought this as a gift for a young man who camps with his parents and who has a keen interest in freshwater turtles. As an amateur herpetologist who spent many years studying and collecting reptiles, I highly recommend this book. Although it does not contain complete information on all Florida reptiles and amphibians, it provides enough information for the average person. A must have for young and old alike.

love this series

I bought this title to help my grandkids recognize the lizards and frogs in my backyard. Either I have exotic species or the book needs updating. It was an okay intro, but there are other titles out there that do a better job with commonly found amphibians and reptiles in the state.

A great book for lovers of Florida's critters. Concise writing, beautiful pages, a real bargain for such a nice book. Young boys will especially love it--the kind of kid that loves squirmy things!

My daughter and her family recently moved to a new home with a wooded area behind it, so I bought this book for them. The kids (ages 10, 8, 3 & 2) all love looking at the pictures. The older children read it to the little ones and they are all becoming familiar with the snakes they should stay well away from and the ones that are more "friendly." A very worthwhile investment. The pictures are beautiful and the wording interesting.

Our 9 year old grandson loves the book. He loves reading about reptiles, amphibians, etc. We have pointed out several reptiles, amphibians that we see in our backyard in Florida that are in the book.

Not comprehensive. Kind of childish. I think a kid interested in reptiles would love it but not an adult wanting a field guide.

My grandson first saw this book at the Naples Children's Museum. When he unwrapped his own personal copy on his birthday, you should have seen the look of joy on his face. We are enjoying reading a little each night- I look forward to many special hours. highly recommend for anyone into reptiles!
