Atlas And Dissection Guide For Comparative Anatomy

Synopsis

Ideal for undergraduate comparative anatomy courses, this classic manual combines comprehensive illustrations, text, and a clear, readable design. Organisms include protochordates, lamprey, dogfish shark, mud puppy, and cat.

Book Information

Paperback: 368 pages

Publisher: W. H. Freeman; 6 edition (February 13, 2006)

Language: English

ISBN-10: 071676959X

ISBN-13: 978-0716769590

Product Dimensions: 8.5 x 0.7 x 10.7 inches

Shipping Weight: 1.7 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 8 customer reviews

Best Sellers Rank: #38,616 in Books (See Top 100 in Books) #31 in Books > Science & Math > Reference #81 in Books > Science & Math > Biological Sciences > Zoology #166 in Books > Textbooks > Science & Mathematics > Biology & Life Sciences > Anatomy & Physiology

Customer Reviews

Extremely detailed and great dissection guidelines. Very simple and easy to follow/ do. The pictures are as perfect as one could ever hope for, without this a zoology/ anatomy class would be near impossible

The book itself is a great way to learn extremely detailed structures of the organisms presented. I can say that unless you are a biology major the wording can be slightly challenging. Other than that, the book is an excellent resource for any upper level dissection class.

Could have been organized better, but overall a great tool for dissections and lab practicals.

Bought for Comparative Vertebrate Anatomy and was absolutely essential for lab! Great diagrams. I photocopied, highlighted, and blocked out names, etc, to study.

As Described

Exactly as advertised.

The product met my standards and was shipped quickly. The product was in the condition in which I expected.

Was written ALL over.
