The Dog Cancer Diet

Synopsis

If your dog has been diagnosed with cancer, he or she needs to start eating a special diet right away. "The Dog Cancer Diet" (Kindle edition) walks you step-by-step through the homemade recipe and how to make the change from your dog's current diet. You will learn about: * How to help your dog fight cancer with food * Commercial Dog Foods & Cancer-Causing Carcinogens * Water Quality & Cancer * Why Grains & Sugars are Bad for Dogs with Cancer * Important Dietary Supplements to Help Dogs with Cancer The right foods--many of which you probably have in your home right now--can be powerful weapons for a dog with cancer. Putting your dog on the diet described in "The Dog Cancer Diet" will accomplish two things: 1) Fight Cancer - while no food is a "miracle cure," there are some that "go after" cancer tumors. 2) Support Immune Response - foods that boost your dog's immune system help your dog's natural defense system. "The Dog Cancer Diet" contains the latest, cutting edge information from one of the leading authorities on dog cancer and full spectrum canine cancer care. Dr. Demian Dressler, DVM (otherwise known as the Dog Cancer Vet) is an internationally recognized expert on canine cancer.

Customer Reviews

This is an outdated version of The Dog Cancer Diet. Dr. Dressler has made some updates in the 2nd edition of the book "The Dog Cancer Survival Guide", and some of the information in this book is no longer valid. I wish I had known that prior to making the purchase, I would have saved my money. Thank goodness it was only \$2.99. I recommend purchasing the entire book instead since it's current and has the benefit of more years of research.

Our beautiful 80lb dog was diagnosed with a large abdominal mass (probable sarcoma) in November 2013- (histotype undetermined) since the aspirate came back inconclusive. The tumor is located in the upper part of his lower back, although they have mentioned the word cancer, they have not been able to determine what kind. The tumor is large (inoperable) and pressing on his large intestine and colon. We just finished 6 doses of palliative radiation, but according to the Vet the tumor did not reduce by a lot. I have been feeding him the high protein diet recommended by the Dog Cancer Diet (with fresh digest enzymes), complemented by a mixture of Nutra-plus, and low residue dog food. God bless his heart he is in good spirits, and very happy! We feel that the special diet combined with the digestive enzymes have helped him tremendously to lessen the straining, and he loves the food!

This book has saved my dog's life and empowered my husband and I to be the best guardians we can. Maggi, our 4 year old Boxer was diagnosed with a Grade 3 (mitotic value that was off the charts) inoperable mast cell tumor in February, 2012 and was given about 3 months. She is about to hit her one year mark from the diagnosis and she is as healthy as ever! Her oncologist is in awe of her tenacity. With prayer and guidance from the book and our vets we are certain that Maggi will beat this. Dr. Dressler is such a blessing. Thank you for caring enough about us and our animals to do this research and write such a wonderful tool to help deal with the horrors of cancer.

Read this book and learn how to help yourself and your dog through the nightmare of cancer. It's comprehensive and technical yet easy to read even if you've never heard anything about cancer. When you are still in shock from the diagnosis, grab this book and take one step at a time because your loyal friend is depending on you to shake it off and get moving!

This book breaks down a good diet for dogs with cancer -- in PLAIN ENGLISH. It explains the science behind it concisely and in a way that is easy to retain, follow, and explain to others if they

ask why you're cooking for your dog instead of feeding your furry friend commercial food which often but not always contain carcinogens which do not help a dog fight the cancer that is already in their body.

While a cure would be most excellent, right now I am looking at her feeling the best she can for as long as she can. The boom was a bit confusing.

Great

It is hard to be sure what helps and what doesn't, but my 15 year old dog is still alive 8 months after the first sign of osteosarcoma and 6 months after amputation. She's doing amazing well. I followed this diet for her and did treatments with my holistic veterinarian. No chemo or anything at her age.
