Build Your Own Fingerboard Skatepark: Boredom Busting Designs For 15 Desktop Ramps And Rails

Synopsis

Are you sat at your desk, bored out of your mind? Well get this cool kit and create your own fingerboard skatepark using some tape and some glue. Containing 15 different designs for quarter pipes, halfpipes, fun boxes, grind rails, and more, you can soon be creating some sick lines right there on your desktop. Every ramp comes with simple step-by-step instructions and uses readily available materials, meaning you could make a ramp out of just about anything. And many obstacles come with a template to make sure your ramps have perfectly smooth curves and angles, which means youâ™ll be busting out amazing tricks at your desk in no time. And the best thing about the book is it comes with your very own fingerboard and the book packaging can be turned into a handy first fun box to get you practicing tricks straight away. You will also get some card to start building ramps with. So what are waiting for... get building!

Customer Reviews

Marty Allen is a Boston-born, Brooklyn-based renegade crafter, puppet-maker, artist, writer, musician and liker of life. He makes all sorts of things. One thing that he is least proficient at is writing biographies in the third person. While he likes to talk about himself at length, in general said missives devolve into something or other about sandwiches. Visit his website at martystuff.com. The author is based in Brooklyn, New York.

To be absolutely fair, I didn't research this enough to realize it was for paper/cardboard ramps. I was hoping for instructions to build various ramps to put together a skate park. That being said this is an

awesome gift for kids. I would have loved for it to have some dimensions and ideas for permanent ramps, but I'm able to use this as somewhat of a guide. This does look like a fun project for parents and kids, despite my confusion. The deck that comes with it is really cool, I thought it would be a flimsy version.

This is an amazing book. Great job Marty. Thanks for putting together such a complete package. My son loves it...

Cool book- fun and easy projects to make with your kiddo

Wasn't as hip as I was hoping but it's a cool book, not really meant for making ramps....

I was very happy the package arrived in time for Christmas but I was disappointed the actual gift was torn on both sides and it looked like it was shipped that way. Luckily kids don't notice things like that so they were quite happy with the ramps and booklet

awesome book! my 9yo loves it. he thinks the author was a really clever guy. has inspired lots of building and creating for him and his younger sibling. much better than buying park components and certainly less expensive. if you want your child to use their imagination, do some work and create their own fun, this book provides the spark.
