Keys To The Trematoda

Synopsis

This is the second of three volumes of *Keys to the Trematoda*, a series on the systematics and identification of the Class Trematoda. The book presents the taxa in the Order Echinostomida and some of those in the Order Plagiorchiida, with keys for their identification at the superfamily, family, subfamily and generic levels. The keys are based on critical examination of specimens by subject experts, and generic diagnoses are accompanied by illustrations of important morphological characters. This volume includes seven echinostomidan superfamilies (the echinostomatoids, haploporoids, haploplanchnoids, heronimoids, microscaphidioids, paramphistomatoids and pronoccephaloids) and two plagiorchiidan superfamilies (the allocreadioids and lepocreadioids). The first volume covered the Subclass Aspidogastrea and Order Strigeida, while the third volume, due to be published in early 2006, will cover the remaining members of the Plagiorchiida.

Book Information

Series: *Keys to the Trematoda* (Book 2)

Hardcover: 768 pages

Publisher: CABI; First edition (June 8, 2005)

Language: English

ISBN-10: 085199587X

ISBN-13: 978-0851995878

Product Dimensions: 9.7 x 1.7 x 6.6 inches

Shipping Weight: 3.8 pounds (View shipping rates and policies)
