Modern Philosophy: An Anthology Of Primary Sources, 2nd Edition

Synopsis

The leading anthology of writings of the modern period, *Modern Philosophy* provides the key works of seven major philosophers, along with a rich selection of associated texts by other leading thinkers of the period, chosen to deepen the reader's understanding of modern philosophy and its relationship to the natural sciences. Building on the strengths of the first edition, the second edition of *Modern Philosophy* is enhanced by the addition of the following selections: Montaigne, *Apology for Raymond Sebond*, "The Senses Are Inadequate"; Newton, *Principia*, "General Scholium," and *Optics*, "Query 31"; Hume, *Dialogues Concerning Natural Religion*, Parts 1-5 and 9-12; Reid, *Inquiry Into Human Mind*, Conclusion, and *Essays on the Intellectual Powers of Man*, "Of Judgment," chap. 2, *Of Common Sense*

What is the ideal text for the professors and students of modern philosophy classes? I can discern at least five essential criteria: it is one that is inexpensive; it contains up-to-date, accurate, and easily readable translations; where possible, it also contains clear, concise summaries of the material to aid in the absorption of the material; it contains engaging biographic that helps situate the thinker within a context and explain his motivations; and, finally, it contains all of the works necessary to teach the class, and more, if necessary, to further explain the context. I know of no English-language modern philosophy collection that better meets these criteria than the Ariew and Watkins anthology. It is significantly less expensive than any of its other most likely competitors. . . . The selections are outstanding. What the other anthologies seem to forget is that, until the

mid-eighteenth century, physics was natural philosophy, and so the writings of Boyle, Newton, and Galileo are equally deserving of inclusion within a philosophical anthology from the early modern period. This is not lost on Ariew and Watkins.[W]hile collections like Baird and Kaufmann are comparable in breadth, none of them can quite match Ariew and Watkins due to their inclusion of the natural philosophers. Add to that the inclusion, in this second addition, of more works by Newton, Berkeley, Hume, and Reid. and the superiority of Ariew's and Watkins's choices for this selection becomes all the more evident. The highlights of this collection are the text summaries. . . . [They] range from extremely helpful to, without hyperbole, breathtaking. For instance, the description of Descartes' Meditations as a diptych was enough to make me want to reread this classic. I applaud Ariew and Watkins on their second edition of this text, and for improving on what is already the industry standard for modern philosophy textbooks. They have done an excellent job of holding on to the kinds of things that worked so well in the first edition, while building on a very strong collection.--Joshua Wretzel, Department of Philosophy, Binghamton University

Roger Ariew is Professor of Philosophy, University of South Florida. Eric Watkins is Professor of Philosophy, University of California, San Diego.

Modern Philosophy spans so much information so this book has so so so much depth to it. Worth the time if you want a full philosophy education. Good book, well structured.

Using this for a Modern Phi course and enjoying the selections. The titles clearly set the author, the kind of text, dates, and there are even intros to put them into their philosophical and historical context. Very nicely done. I'll be keeping my copy as a reference, I'm enjoying it so much!

Not a dull textbook read in my opinion.

Purchased for an MIT/OCW on-line course at a bargain price. All the usual suspects are reproduced with useful intro material. "The man who hid well, lived well" ~~Voltaire

This is an accessible introduction to Modern Philosophy. What is valuable is that (1) It compiles various important readings in one volume (2) The translations are in clear, modern English.

Didn't really use it, but the content is interesting nonetheless. Definitely worth it if you like philosophy

and rationalism. :)

Bought for daughters college class. Nuff said.

I BOUGHT IT IN MY COLLEGE'S BOOKSTORE WHERE COST ME 48 BUCKS. FOR THE SAME BOOK, THIS ONE IS A LITTLE BIT CHEAPER.
