# Goodbye, Europe? Hello, Chaos?: Merkel's Migrant Bomb

## **Synopsis**

They come from across the Middle East, South Asia, North Africaâ "floods of refugees seeking sanctuary in Europe. Most are men. Some are terrorists. And all represent an ethnopolitical nightmare for the European Union. What drives these migrants? Why, instead of seeking out nations with common ethnic and religious ties, do they instead head north and west, where few speak their language or share a common culture? In Goodbye, Europe! Hello, Chaos! Merkelâ ™s Migrants, former diplomat J. Michael Springmann provides an in-depth analysis of the migrant flood, its causes, and what it means for Europe. Building on arguments put forward in his previous work, Visas for Al Qaeda: CIA Handouts That Rocked the World, the exâ "State Department official and attorney reveals how US foreign policy created the crisis. Destabilizing nations through invasion and espionage furthers US goals in the Middle East, he argues, creating migrant waves guided northward and westward to destabilize the European Union in general and Germany in particular. Germanyâ ™s own refugee program, designed to exploit migrants as cheap labor, made US intelligence efforts all the easier. Springmannâ ™s insider knowledge of US policy permeates this insightful, sometimes terrifying look at a world where migrants become weapons, nationalism is condemned, and civil liberties hang in the balance.

J. Michael Springmann is an attorney and former diplomat who lives and works in Washington, DC.

He holds two degrees in international affairs in addition to his law degree. Springmann spent nine years as a diplomatâ "five in Germany, two in India, and nearly two in Saudi Arabia â "with the US Department of State. Prior to leaving the department, he served in its Bureau of Intelligence and Research. He has belonged to a number of Arab and Muslim organizations and has received a Pro Bono Attorney of the Year award from the American Arab Anti-Discrimination Committee. Now a writer and political commentator, Springmann is also the author of *Visas for Al Qaeda: CIA Handouts That Rocked the World*, which discusses Americaâ "s destabilization of the Balkans, South and Southwest Asia, and North Africa to achieve international goals.

If you want to really understand what's happening in the world today, "Goodbye Europe? Hello Chaos?" is a must read. Author J. Michael Springmann shows how mass migration is used as a weapon to destabilize nations. He explains how it has been done in the past, how it is currently being used in Europe and who is behind this weaponized migration, including some NGOs, billionaires, corporations and of course, intelligence agencies. Springmann shows how forced migration is a form of warfare used by the US to destabilize the Middle East and weaken Europe. The information in this book is well documented with 354 footnotes. I would also highly recommend his previous book "Visas for Al Qaeda".

S. Michael Springmannâ "s book, "Goodbye Europe? Hello, Chaos?: Merkelâ "s Migrant Bombâ " certainly presents a mind-jarring alternative perspective on Europeâ "s migrant crisis. It is hard to know which of a few notable characteristics of these migrants are most important. For example, (1) a very large percentage are young fighting-age Syrian men; (2) high-tech electronics (smartphones, etc.) and infrastructure for Internet connectivity are provided them by the likes of George Soros, Big Business, and, maybe, CIA front organizations; and (3) passports and visas from other-than-official channels. Not only are these migrations not what they appear to be, they are apparently a slow-moving form of warfare much more difficult to defend against than conventional military movements. Migrants have become instruments of war. I highly recommend this book for those wishing an insight into geopolitics in the twenty-first century that is radically different from the past.

This is a fascinating book on the refugee crisis in Europe, and what is happening throughout Europe. I am so much enjoying reading this book by an author I trust and know is telling you the truth! His analysis and information is more than interesting, and please do buy this wonderful and so

interesting book. I am 1/2 way through the book and can't put it down. Wonderful book, and this author also brought us Visas for Al Queda that was equally so interesting, and which I refer back again and again to the information! Thank you Mr. Springmann for your wonderful work on these books!!

If you want to understand the "European Migrant Crisis" look no further than Goodbye Europe? Hello Chaos? It is required reading for everyone interested in current events. I fail to understand why the mainstream media do not tell these stories. Springmann also exposes the shadowy figures behind the scheme to destabilize the EU. It's time people took the blinders off their eyes and recognize what's happening. Invasions are invasions. History is full of this. We had better start paying attention for our own good. Read it NOW!

Goodbye Europe? Hello Chaos? I consider one of the very rare books that are so deeply and extensively researched and so widely and authentically sourced. It discusses frankly and uninhibitedly the worldwide wave of migrants, refugees and asylum seekers which flooded many European countries and threatened to break on our shores. The author unearthed the roots of the problems which caused that human deluge of millions. Mr. Springmann lays the blame on many factors including turmoil, political instability, unemployment, poverty, aspiring to better life and mainly violence and wars in Asian, North African and, in particular, Middle Eastern countries. He stresses that the major cause of the outflow of that flood is the United States' foreign policy which he claims is bent on using the migrant waves as a mass destruction weapon. He reports many of the social, economic, cultural, demographical and political problems, legal and illegal, refugees created in each country especially nations of the European Union where serious crime rates has increased considerably. The author discusses in detail the problems each country faces separately then lumps all of them into one serious world crisis. He sharpens the focus narrowing the aperture on Germany, being the most important and populated European country, and uses it as an example of how the open-door policy for refugees and asylum seekers would tear the cultural and national fabric of a country by aliens whose presence threatens not only the unity of Germany but also the solidarity of the European Union. Thanks to my friend Greg who recommended that I read the book which, I in turn, recommend that every U.S. lawmaker, politician and even interested voters and laymen should read it. It is timely and comes in a propitious moment when the American debate on immigration, refugees and border protection is heating up. The book is a warning shot which directs attention to the migrant problems and as a reminder that solutions

are urgently needed. The author offers some reasonable ones. Mohamed Ghuneim Annandale, VA

Michael Springmann has done it again! I was both shocked and angered by what I read. He warns us that Constitutional Governments in Europe are being assaulted internally by unelected administrative bureaucrats from the EU administrative state and externally by an international plot to destabilize the European Continents homogeneous culture through the forced migration of a hostile alien culture which can not be integrated. This book is required reading for all those who are concerned to learn why, who and how these weaponized refugees, whose own countries are being destroyed, are encouraged to leave on a difficult 2000 mile journey to countries in Europe who do not want to receive them, while their own neighbors will not take them.
