Trees And Shrubs Of The Pacific Northwest (A Timber Press Field Guide)

Synopsis

In *Trees and Shrubs of the Pacific Northwest*, Mark Turner and Ellen Kuhlman cover 568 species of woody plants that can be found in Oregon, Washington, British Columbia, and northern California. The comprehensive field guides features introductory chapters on the native landscape and plant entries that detail the family, scientific and common name, flowering seasons, and size. Each entry includes color photographs of the plant's habitat and distinguishing characteristics and a range map. *Trees and Shrubs of the Pacific Northwest* is for hikers, nature lovers, plant geeks, and anyone who wants to know more about, and be able to identify, the many plants of the Pacific Northwest.

Good book for finding some of WA. trees and shrubs

The book was a gift also, I did get to use it while visiting Seattle this summer. Great book!

Mark Turner's field guides will not disappoint you. I have been waiting for the release of this volume for over a year now, and pre-ordered it as soon as it became possible to do so. It is the perfect bookend to his "Wildflowers of the Pacific Northwest." He covers trees and shrubs from BC to northern California in this volume, so there might be more information than you think you might need, but his thoroughness makes up for having to page through species from out of the reader's immediate area. As was the case with "Wildflowers," his photographs are as true to color as it is possible to effect. This guide is superb addition to any serious naturalist's bookshelf!

Very helpful field guide

An excellent source of Pacific NW Shrubs.

Arrived in good shape and much enjoyed. Thank you

Well liked by the person I got it for

I visited Olympic National Park this year & was disappointed that they did not have a booklet available identifying all the glorious trees & ferns & other plants growing in the park. To prepare for next year's visit I found this book. It is just what I wanted: well-organized, clear & illustrated in color. Shame on the Park Service for not making such a resource available in the park.
