Proceedings Of The Seventh ASTM-Euratom Symposium On Reactor Dosimetry: Strasbourg, France 27â€“31 August 1990

Synopsis

THE EURATOM WORKING GROUP ON REACTOR DOSIMETRY AND THE ASTM-EURATOM SYMPOSIA The Euratom Working Group on Reactor Dosimetry (EWGRD) started around 1960 with members having been nominated by the governments, from each European laboratory working in reactor physics and technology. The goal was to exchange directly experience and know-how in reactor dosimetry and related programmes. A need for normalisation was felt in order to guarantee that: the same nuclear data is used; measurements in different laboratories give the same results (need for intercalibration experiments and standards); results are expressed such that a comparison with results from other laboratories is possible. In sub-groups, specific arguments were discussed resulting in final recommendations. These final recommendations were then discussed in a plenary meeting and accepted as a recommendation for European usage. Several of these recommendations were published, e.g. radiation damage dosimetry guidebooks, and a nuclear data guidebook. Also a programme, executed by the BCMN GEEL, for the production and selling of Reference Materials for Neutron Dosimetry is sponsored by the EWGRD. Workshops in the field of radiation damage and on the pressure vessel steels programme in Europe were successfully organised. The group works in close contact with ASTM (American Society for Testing of Materials). Altogether seven symposia were jointly organized, and held, alternatively in Europe and USA. The next symposium, the eighth, will be organized by ASTM in 1993 in the USA.

Book Information

Paperback: 954 pages

Publisher: Springer; Softcover reprint of the original 1st ed. 1992 edition (September 13, 2013)

Language: English

ISBN-10: 9401052352

ISBN-13: 978-9401052351

Product Dimensions: 6.3 x 1.9 x 9.4 inches

Shipping Weight: 3 pounds (View shipping rates and policies)
