Customer Reviews

Lab manual material is not the best; I recommend you make copies of the pages you are completing and turning in because if you erase on a page, you're not just going to erase your pencil marks--the page's colors will also disappear! I warn you about this because some professors (as was the case with mine) are sticklers for neat work. The questions in this lab manual are often so poorly written they end up accomplishing the complete opposite of their intended purpose (learn Geology). Instead, students spend more time trying to figure out what the questions mean. Thus, if you are taking Geology online and this lab manual is required, you're doomed. Take Geology in a classroom setting if you can, trust me. My class was fortunate because we had a professor who took the time to "interpret" each question in plain English--that's how sad it was.

This lab manual requires sheets to be done and torn out of it in order to hand in to the professor.

The work sheets are all gone, thus it making it impossible to do the work! What a waste of money! I had to re-purchase the text! Beware if you need to order this book, especially if it's used!

You have been warned, I didn't buy a used one and I am so glad because some people in my class did and they have missing pages because this is the type of Lab Book that you have to tear your pages out for the Lab Assignment and turn it in. Just like the book it's not heavy at all :)

The manual was not new, but was in very good condition. So far, I have not found any missing pages, but there is some writing in the manual, which is not an issue for me.

Thorough, concise, well written, easy to follow. Handy metric conversion table. The manual went closely hand-in-hand with my text and supplemented the information in greater detail. Graphs, maps, and pictures were easy to understand and relate to the text. Charts and symbols in the back were a plus.

Good Condition

This really isn't a bad lab manual. It has good info, good excersises, and is well organised. But when you recieve the book, hold it in your hands and examine it, the first thing you are going to wonder is WHY ON EARTH IS THIS BOOK SO EXPENSIVE??!!

Im probably the first one of my classmates to order their book so far in advanced. I love having my books on the first day of class. Excellent service fast and speedy. Love doing business with an excellent person.
