Counseling And Educational Research: Evaluation And Application (Volume 3)

Synopsis

The Third Edition of *Counseling and Educational Research: Evaluation and Application* emphasizes the importance of being a good consumer of research and teaches readers how to conduct research in practice. Written in an engaging, conversational tone, the book uses concrete examples from professional literature to demonstrate how to effectively evaluate and interpret research articles without relying on discipline-specific jargon. The Third Edition features new examples, updated research, a new chapter on single-subject research, a new chapter on the use of technology and research, and much more.

Customer Reviews

"Houser is the best text available for a master's level course that examines research from the perspective of counseling practitioners rather than researchers."--Annette F. Nelligan, University of Maine
"Houser describes research methodology and techniques in a way that novice researchers can understand. This book is written in a wonderful transparent style."--Delila Owens, Indiana Wesleyan University
"Houser is an exceptional writer whose examples and explanations assist each one of us in understanding the complexity of research."--Jo Ann Jankoski, Penn State University
"This textbook is timely, relevant, and student friendly."--Lakitta Johnson, Jackson State University
"This text is an effective tool in counseling research education. It reads easy and is clear in both clarity and flow."--Shon D. Smith, Argosy University, Sarasota
Throughout the book, I was struck with Houser's lucidity and skill in summarising. Overall the short, well-researched chapters do work. As a Third Edition, the book has many updated features. The book is both generally useful

and particularly suitable for those in the education and counselling fields.--Dr Anuradha J Bakshi

"The Counseling and Educational Research text is a wonderful way to help familiarize Masters-level counseling students with the research process, and how it can be used to enhance their own understanding of research. It is a practical and easy read...I would recommend it for any Master-level counseling course."--Ja'net M. Seward, Midwestern University

This is a very good book for starting out. I'm in a masters program for Clinical Mental Health and just starting to learn more about research. This book gives some very good information without getting to overwhelming. The chapters are fairly short and therefore I found them easy to digest. if you are interested in research, this will barely get you started. However, if you want to be a counselor who keeps up with the latest research in your area, this is a fantastic book for learning how to determine how good a research study is. For example, just a few weeks into class I chose an article that was conducted and published in another country and wow, I was surprised at the lack of quality. I haven't come across many like that but you will learn how to evaluate research and high quality research will stand out. Recommended book!

A great guide for research

This was a great book- used it for my Counseling Theory and Practice I class. Was very informative and easy to follow.

Informative and easy to follow.

This book is not very clear and needs better editing. It does not have the clarity and order I expect from a text book on the subject of Research. I do not recommend it.

Great textbook!

Got the book in a few days, brand new, everything is great

The book is dirty and has a stain on the bottom right corner that looks like coffee.
