E-Myth Veterinarian

Synopsis

Leading a veterinary practice can seem like a daunting task, with too few hours in the day, too many petty management issues, and problems veterinarians at large practices don't seem to face. E-Myth Veterinarian offers you a road map to create a veterinary practice that's self-sufficient, growing, and highly profitable. Take your practice to levels you didn't think possible with this unique guide!

#615 in Books > Audible Audiobooks > Science > Medicine #4164 in Books > Business & Money > Small Business & Entrepreneurship > Entrepreneurship

Customer Reviews

I was familiar with the E Myth having read it years ago. The concepts are so much clearer with the addition of a veterinarian author who shares his industry-specific experiences to the E Myth ideas. I not only thoroughly enjoyed it as a Veterinary Practice Manager, I also ordered a copy for my employers because I believe that the ideas presented here can help veterinarians enjoy a better quality of life and lower stress levels than is the accepted norm. It was very well organized and it's a short, yet very thought-provoking, motivating read.

This book is awesome! Its filled with really great info, is easy to read quickly and addresses a lot of issues that veterinary practice owners need to think about but don't. This helps you discover what you need to do to go from working in your practice to working on your practice! I recommend to anyone who is an owner or is thinking they'll want to own a practice someday.

The audio book seemed pretty good, except Disks 3-6 were blank! Not worth the price if you can only listen to the first few chapters. Disappointed.

Great book to help practice owners re-think how to improve both their own individual performance/life but that of the practice as well.

good information

I had already read the E-Myth and this is a fantastic veterinary version of the original book! All veterinarians, owners or not, should be intimately familiar with the principles it covers!

Not truly enlightening for my stage of practice > 35 years . But worthwhile read for point of reference..... Bottom line is really all about managing HR and inventory and lead by example = not expect others to do more than you are willing to do yourself
