How Do Dinosaurs Fit Into The Bible?: Scientific Evidence That Dinosaurs Lived Recently

Synopsis

There are 12 lines of evidence that show dinosaurs were created spontaneously by God and lived recently. This book covers them all! Dinosaurs: 1-Are cleverly designed. 2-Are lacking in both ancestors and transitions in the fossil record, showing they were spontaneously placed here by God. 3-Were better designed for the first "version" of the Earth (the pre-Flood world). 4-Are part of a vast fossil record, indicating a massive catastrophe like Noah's Flood. 5-Were buried furiously (disarticulated). 6-Were quickly buried in mud. 7-Were buried simultaneously "fleeing in groups. 8-Are frequently found mixed together with marine fossils. 9-Are frequently found buried without juveniles. 10-Have at least 14 "fresh" biomaterials in their bones that cannot last for millions of years. 11-Have carbon-14 in their bones. 12-Have been found in pristine "mummified" condition.

Book Information

Paperback: 88 pages

Publisher: CreateSpace Independent Publishing Platform (February 16, 2017)

Language: English

ISBN-10: 1543174256

ISBN-13: 978-1543174250

Product Dimensions: 5.5 x 0.2 x 8.5 inches

Shipping Weight: 5.9 ounces (View shipping rates and policies)

Average Customer Review: 2.0 out of 5 stars 1 customer review

Best Sellers Rank: #150,849 in Books (See Top 100 in Books) #20 in Books > Science & Math > Biological Sciences > Animals > Dinosaurs #444 in Books > Christian Books & Bibles > Theology > Apologetics #3397 in Books > Religion & Spirituality > Religious Studies > Theology

Customer Reviews

The author has "Ph.D" after his name on the cover, but it's not in paleontology or geology, but psychology. This short book (more like a booklet) is essentially a promotion of young-earth, anti-evolutionary claims, with each topic treatment only dealing with literature and interpretations favoring that view, largely ignoring mountains of evidence that contradicts YECism, even from other Christians. For example, Biddle promotes the idea that the book of Job in the Bible describes a sauropod dinosaur, even though a more careful look at the verses in question shows that both scientifically and Biblically, other interpretations are more likely. For more info on that Google "Was Behemoth a Dinosaur?, Kuban" He tries to argue that the fossil record indicates that dinosaurs and

most other fossils were buried in the Genesis Flood only a few thousand years ago, whereas mountains of evidence to the contrary (including the details of fossil succession) are ignored. He claims that fresh, unfossilized dinosaur bones were found in Alaska, but even other YECs dispute this, and it was never properly documented. I give the book two stars instead of none only because the author seems sincere, and because not everything in the book is wrong, though much of it is. For a far more sound treatment of these issues from a Christian perspective, see the bibleandscience dot com website or anything by the American Scientific Affiliation.
