Rehabilitation Nursing: A Contemporary Approach To Practice

Synopsis

Rehabilitation Nursing: A Contemporary Approach to Practice is a clinically-focused text designed to integrate rehabilitation into an academic curriculum, educate nurses new to the specialty, and aid practicing nurses preparing for certification. Incorporating competencies set forth by the Association of Rehabilitation Nurses (ARN), it includes key terms, learning objectives, case studies, critical thinking, personal reflection, resources, and web links. Evidence-based and practical, this text offers unique and expert insights from an interdisciplinary author team drawing from nursing, physical, occupational, and speech therapy, psychology, social work, nutrition, veterinary medicine, law, business, and many more. All chapters address ethics, research, and teaching and include a wide-variety of topics such as stroke, brain injury, spinal cord injury, amputation, joint replacement, neurological problems, cardio/pulmonary, chronic illness, pediatric and geriatric rehabilitation, and health policy. In addition, it explores exciting areas such as polytrauma, life care planning, and animal assisted therapy.

Customer Reviews

Book was in good condition

good book. great price!!

Dr Mauk is an expert in her field. I had the privilege of having her as a Prof in my Nursing undergrad

program at Valpo. This textbook is a valuable resource for all nurses. Thanks Dr Mauk

Easy read, pretty informative.

So clearly if you are about to buy this book its because it is required for school....our professor read one page from it and then told us she will not be using it anymore, so we just used our med-surge book for all information for rehab. Why you ask? Because after EVERY SENTENCE there is a citation. We are reading a book that is just citing every sentence (McNabb, 2014) How annoying is it to not only read fluff, but also know the author has no original thought (McNabb, 2014). I read three chapters and learned nothing (McNabb, 2014) The book gives no new information, just vomits sentences a child could have created (McNabb, 2014) If you have to buy this book, i feel bad for you son, I got 99 problems and this book aint one. Hit me! (McNabb, 2014) Tell your professor to read a chapter for spinal cord (or any chapter but you'd think for spinal cord you'd learn a lot since theres a lot to learn!) and you'll realize what i mean. THIS BOOK IS WORTHLESS (McNabb, 2014)
